

PRESS RELEASE

SPEECHLY BIRCHAM SELECTS BSO NETWORK SOLUTIONS FOR HIGH-SPEED NETWORK LINK BETWEEN INTERNATIONAL OFFICES

~ signs 3-year deal for Virtual Private LAN Service ~

France, January 12th 2012 - International law firm, Speechly Bircham is working with BSO Network Solutions to ensure high-speed communications links between its newly opened international offices and its London HQ.

With expansion into Zurich and Luxembourg last year, Speechly Bircham wanted to ensure the new offices had high spec voice, data and internet services, guaranteeing reliable voice connections as well as fast access to corporate systems.

As a result, it opted for BSO Network Solutions' Virtual Private LAN Service (VPLS) to ensure a high speed, high availability, ultra low latency connection for the business.

The market leading service includes two fully resilient 10Mb VPLS data connections to the Zurich office and a 10mb VPLS data connection with a Virtual Private Network (VPN) backup to the Luxembourg office to ensure data availability.

The high spec links between the offices are fully redundant and the service is based on the lowest latency routes between London, Zurich and Luxembourg City. BSO Network Solutions also offers compelling SLAs to support the business critical applications, ensuring the effective management and delivery of the services it provides.

“The technology in our new offices was viewed as a critical component of their success as communication, both internally and externally, is key to the speed at which business can be completed,” said Robert Cohen, Director of Information Technology at Speechly Bircham. *“Working with BSO Network Solutions we’ve been able to set up fast reliable links between our international offices ensuring that technology is supporting our business every step of the way.”*

“The agreement with Speechly Bircham demonstrates our ability to take a unified global network approach, providing full local in-country network support, and a scalable, flexible network for future technology and business growth,” BSO Network Solutions' managing director, Fraser Bell commented.

About BSO Network Solutions

As an operator of tailor-made infrastructure solutions and services, BSO Network Solutions provides major accounts, SMEs, operators and service providers with managed NaaS (Network as a Service), IaaS (Infrastructure as a Service) and PaaS (Platform as a Service) solutions. The complementarity of its 3 main offerings enables customers to process, store, secure and deliver their data:

Network services: BSO Network Solutions owns a Nx10Gbps network that is already compatible with 100Gbps interfaces and covers 18 countries. It has offices in Paris, London and Hong Kong.

Hosting: BSO Network Solutions offers tailor-made, optimal-quality hosting services for your applications and infrastructure, and with more than 45 hosting facilities in 12 countries guarantees 99.999% availability.

IT integration: BSO Network Solutions is a one-stop shop providing personalized guidance for the selection, integration and deployment of reliable, high-performance solutions that are tried and tested in our own laboratory. BSO Network Solutions is also a technological think-tank and a global NOC available 24/7/365.
